Pulling-in-Dogs are an accessory to Wire-Drawing process, particularly, Ferrous Wire Drawing. They are used to drag the inlet wire around drawing blocks of machine, until there is an adequate 'wraps' of wire around blocks for the machine to continue feeding automatically.

Bharat Industries has an experience of over 35 years in pulling-in-dogs, enabling us to better understand the need of wire-drawing industry for pulling-in-dogs. These pulling-in-dogs are suggested for usage especially for lighter drawing applications, predominantly steel and other softer non-ferrous applications.

Special Attributes

- The wire is pulled tangentially, preventing any bends in it.
- Spring loaded jaws
- Dog-curls around block
- Single piece body made of steel
- Jaws made of hardened steel having radius profile as per your requirement.
- Universal shackle enabling usage with different types of chains and rope.
